

Managing a complex healthcare system isn't easy; but keeping track of resources can be with our Enterprise Platform, CATAMARAN

## SHIPCOM APPLICATIONS:

- **a/Care – Asset Management**
  - Location/Tracking
  - Utilization/Par Levels
  - Inventory Management
  - Recall Management
- **e/Care – Environmental Management**
  - Temperature Monitoring
  - Humidity Monitoring
- **s/Care – Sterile Processing Dept. (SPD)**
  - Instrument Tracking
  - Tray Assembly
  - Tray/Case Cart Management
- **c/Care – Cardiac Cath Lab**
  - Inventory Management
  - Charge Capture
  - Replenishment

### Meeting the Challenges of Delivering Cost Effective and Accountable Care.

Shipcom understands that hospitals can remain competitive by improving productivity and continuously focusing on providing the highest quality patient care. In this challenging environment hospitals face:

- Increasing Competition
- Complex Federal and State Regulatory Guidance
- Declining Reimbursements
- Complying with Joint Commission Mandates

### Why AIDC is so critical?

From the C-level on down, hospital staff are responsible for effective utilization of all hospital resources. AIDC provides actionable intelligence through real time visibility of Assets, Clinical Processes, Inventory, and People.

- Eliminates staff involvement for data collection and analysis
- Provides automated real-time tracking & monitoring for inventory management and workflow process improvement
- Improves asset management by minimizing shrinkage and waste as well as maintaining accurate inventory
- Initiates alerts & notifications
- Enables dashboards & reporting
- Creates business intelligence

### Shipcom has been implementing AIDC solutions since 1997

We have installed CATAMARAN, with essential dashboards, for continuous situational awareness in over 300 locations providing integrated RTLS, mobility, and other AIDC technologies for workflow management. Shipcom staff can expertly identify patient safety solutions in addition to leveraging RTLS/RFID for the most common hospital asset tracking solutions. Our primary goal is to improve the quality of patient care, while reducing operating costs.

### Why Shipcom?

As an independent AIDC integrator we provide solutions for all on-market technologies. We will help you identify and choose the best solution, customized to meet your requirements such as scalability, utility and cost. CATAMARAN's Enterprise Platform:

- Is AIDC Technology Agnostic
- With a Single Graphical User Interface (GUI)
- Allowing Conditional Logic & Alerting Framework/Notifications
- Enabling Built In Dashboards & Reporting to provide continuous Situational Awareness

### Implementation Methodology:

Shipcom uses an adaptive methodology that allows implementing AIDC for operational and clinical solutions. We allow the Department/Activity to identify and prioritize the applications which will allow our experts to determine which AIDC technology best meets your requirements! CATAMARAN enables hospitals to implement multiple and hybrid AIDC technologies utilizing one easy to use system across multiple applications!
