COVID 19

Product Catalog of Available Items
Project Title: COVID 19 – Product Catalog of Available Items

1.1 Introduction
Shipcom has been performing medical and non-medical supply chain logistics since 2008 and has established a variety of distributor relationships in both CONUS and OCONUS. We maintain significant vendor relationships throughout the globe, including a reseller agreement with McKesson, the leading healthcare company for wholesale medical supplies & equipment, pharmaceutical distribution, and healthcare technology solutions. Additionally, we offer and a state-of-the art workflow and tracking capability using our proven technology platform, Catamaran NextGen.

SFS is a subsidiary company of Shipcom Wireless. We are a small business, based in Aberdeen, Maryland with offices in Houston, Texas and Arlington, VA.

Some of our experiences include:
Veterans Affairs Point of Use contract - Our scope included conducting assessments of the warehouse/supply rooms, recommending new build up to those facilities that included installing sensor-based shelves for full accountability med/surgical supplies, purchasing of equipment, integrating with Cardinal Health and other medical company systems to ease ordering and reduce duplicate ordering and errors, implement/deploy technology and provide overall program management and training to the entire VA staff. Furthermore, Shipcom owned and operated warehouses in Houston that served as a staging point, where all the supplies and equipment ordered for each VA hospital was received, tracked, issued and distributed to the hospital that was scheduled to go live.

Distributor Relationships. We worked through current VA vendors, Federal Supply Schedule, Group Purchasing Organization, and other entities not only to receive a robust selection of medical surgical supplies and equipment, but also to negotiate best and transparent pricing between manufacturers and distributors.

Medical Supplies. We established a team of clinicians whereby their responsibility was to evaluate and select best med/surgical product for sourcing to include brand versus equivalent.

Veterans Affairs VISN 10 RTLS contract, we implemented and deployed a real-time locating system (RTLS) at 7 locations in Ohio, at their Cardiac Catheter labs. We managed each supply containing approximately 500-750 medical/surgical items, including stents, pace-makers and other relevant medical inventory.

1.2 Available Products
We are poised to support your requirements. Please see below the list of products we have available and can deliver immediately when the order is placed.

This is not a comprehensive list. We have many other items available. Please contact us for items you may need that is not listed on this catalog.
1.2.1 Masks
Below, we can provide 2 different masks (surgical masks, and N95 masks). Both products are FDA and CE approved. Please see below the descriptions, price and specs.

1.2.1.1 Disposable Medical / Surgical Masks
Size: 17.5 X 9.5 cm
Material: Double-layer non-woven with melt-blown non-woven filter layer.
Carried Standard: VY 1 T 0969-2013
